ISSUE #10

Spring is in the air

With spring in the air, we can finally start turning the heating down. It's a great time to think about spring cleaning your business' heating, ventilation and air-conditioning (HVAC) equipment, especially as we approach summer and the increased need for cooling.

Did you know that poorly maintained HVAC equipment can increase energy consumption by up to 30%? It's also estimated that 40-52% of total energy consumption in commercial buildings is being used by HVAC systems.

So what can you do to save on your energy bills, while still keeping your staff comfortable in hot and cold months?

Spring is a great time to get your HVAC equipment serviced, to maximise efficiency. Or, it might be time to upgrade to a new system, as newer systems can be 20-40% more efficient than older ones.*

Ensuring your thermostat is adjusted to the correct setting is also important. As the weather gets warmer, you should set it between 24-27°C with the cooling kicking in when the temperature goes above 27°C. Don't have a thermostat? You can purchase a relatively inexpensive plug-in electronic thermostat called HeaterMate, which will automatically turn off the power to your heating or cooling appliance once the room reaches your desired temperature. The Heatermate Plug-in Digital Thermostat is currently available to purchase from our Online Store, along with a range of products to help you maximise your energy usage – go to simplyenergystore.com.au.

And don't forget to turn off your HVAC systems when your building is not occupied. The easiest way to do this is by using an automatic on/off timer, which is provided as standard with most modern units.

Get an Energy Check Up online

Did you know that if staff get into the habit of reducing energy use at home, they're more likely to bring those habits to work and reduce the energy they're using in the workplace.

Simply Energy has a great tool to help you understand where you're using energy, so you can take steps to reduce it, to help save money on your energy bills. Our Energy Check Up, is free, available online, takes less than 10 minutes to complete and based on the answers you provide, will give you a customised report with energy usage recommendations for the future.

Pop the link to the Energy Check Up on your kitchen notice board or in a company newsletter and encourage staff to take a look today.

Get started at simplyenergy.com.au/check-up

MyAccount makes it easy to manage your account online

Managing your account with Simply Energy is a whole lot easier with MyAccount. There's a range of great self-serve features available to you.

With MyAccount you can keep your contact details up to date, switch to e-billing, register for direct-debit or even better, pay your bills in an instant online. You can also view your payment history, as well as check the details of your energy plan to see what offer you're currently on.

Always have MyAccount at your fingertips with access via the website or to make life even easier, download the Simply Energy app from Google Play or the App Store to have all of these great features on your mobile.

To register have your customer number handy and visit simplyenergy.com.au/myaccount
